

# GLOBAL SOLAR EXPERIENCE

RES develops, constructs, and operates centralized and distributed solar photovoltaic (PV) projects around the globe. We have over 3 GW of solar PV in development and have constructed over 800 MW of solar in Canada, France, the United Kingdom, and the United States.

## SERVICES

### DEVELOPMENT

RES develops solar projects around the world in several markets. Our development team coordinates in-house expertise to ensure cost efficiencies are included at every stage of a developed project - from land acquisition all the way through construction. We secure cooperation with local landowners, communities, and government to achieve optimal results. The team also originates power purchase agreements.

### CONSTRUCTION

Our integrated engineering and construction teams manage the entire solar construction process from establishing a budget and schedule to final testing and commissioning. RES is a general contractor that will provide fulltime, on-site staff responsible for the safe and successful construction of solar projects and we self-perform a large portion of the scope of work including civil, electrical, and mechanical construction works.

### OPERATIONS

With well-established asset management teams our clients benefit from the close relationships we maintain with suppliers and service providers, throughout solar project lifecycles. We offer professional in-house technical and engineering expertise, including a 24-hour control room for planned proactive management and compliance. This helps maximize energy generation and lower operational costs by avoiding any expensive failures.

>3GW SOLAR PROJECTS UNDER DEVELOPMENT

OPERATING 27 SOLAR PROJECTS GLOBALLY

## NORTH AMERICA SOLAR PORTFOLIO

Our in-house development, construction, and operations expertise bolsters RES' reputation as the trusted energy advisor to clients interested in clean solar power. RES designs safe, reliable, economical, and sustainable solutions for bulk power purchasers and asset owners using solar PV technology. We offer clients local solar energy solutions, which provide controllable, competitive, and predictable power.

RES is the world's largest independent renewable energy company active in onshore and offshore wind, solar, energy storage and transmission and distribution. At the forefront of the industry for nearly 40 years, RES has delivered more than 18GW of renewable energy projects across the globe and supports an operational asset portfolio of 6GW worldwide for a large client base. Understanding the unique needs of corporate clients, RES has secured 1.5GW of power purchase agreements (PPAs) enabling access to energy at the lowest cost.
