

Notice of Renewable Energy Systems Canada Inc. Big Sky Solar Power Plant Project

Renewable Energy Systems Canada Inc. (RES) is proposing to develop, build and operate the Big Sky Solar Power Project (Big Sky). Big Sky is a 140 MWac solar energy generation project located approximately 2.5 kilometres northwest of the hamlet of Acadia Valley, Alberta. As part of Big Sky, RES will be required to install an approximately 30 m telecommunications tower located within the Big Sky fenced substation shown on the map as a red square.

RES has sent out project information packages to stakeholders in the area surrounding the project. For more information about the project please call, email or visit the website.
